

Hi 👋, I'm Oleg Zuev

Senior Backend Engineer

Senior Backend Engineer with 8+ years of experience building high-load distributed systems. Specialized in designing scalable backend architectures using Golang, Node.js, PostgreSQL, and RabbitMQ, with strong fullstack capabilities in React and Next.js. Delivered projects serving 1M+ DAU. Prize winner at Hack-a-TON 2022 and Telegram Mini Apps Contest.

Work Experience

Senior Backend Developer

STON.fi

Top 1 DEX on TON Blockchain

September 2023 - Present

Go TypeScript PostgreSQL RabbitMQ TON

- Designed and built comprehensive marketing infrastructure including main website, Telegram Mini App with 400k+ MAU, onboarding, and airdrop distribution
- Architected high-throughput event processing pipeline using RabbitMQ and PostgreSQL, handling 50k+ daily blockchain events
- Developed AI-powered community moderation system that automated 80% of routine moderation tasks
- Built centralized authentication service enabling secure SSO across the product ecosystem

Senior Fullstack Developer

VEON

Major mobile operator in Russia

June 2022 - September 2023 (1 year 4 months)

.NET TypeScript

- Spearheaded the redesign of beeline.ru elevating the digital experience for Russia's largest mobile operator with 50M+ subscribers
- Engineered business-critical features enabling customers to personalize and switch to premium phone numbers, driving engagement and revenue

Frontend Infrastructure Engineer

Yandex

Largest movie streaming platform in Russia (Kinopoisk)

June 2021 - May 2022 (1 year)

TypeScript JavaScript Kubernetes CI/CD pnpm DevOps Node.js

- Managed Frontend DevOps for Kinopoisk
- Led migration of legacy services to Kubernetes and modern CI/CD pipelines
- Pioneered pnpm adoption for monorepo management at Yandex

Full Stack Engineer

VK

Largest social network in Russia

July 2018 - April 2021 (2 years 10 months)

React Node.js TypeScript PostgreSQL

- Started as contractor building chatbots for VK marketing projects serving millions of users
- Promoted to full-time at 16 — youngest developer hired in company history
- Built MVP of social wellness app that grew to 5M MAU

My Achievements

- Contributed performance improvements to Next.js (pull request #33306)
- Migrated all Kinopoisk monorepos to **pnpm** (first at @yandex)
- Won prizes in:
 - Telegram Mini Apps Contest
 - Hack-a-TON
